

Plow Through Critical Fleet Data With Ease

BENEFITS

Every time you use PreCise® MRM you save your municipality money and improve job performance.

Here's how:

- Lower fuel costs by managing idle times, routes and driver behavior
- Plan operating budgets more effectively with accurate material usage reports
- Reduce costly tort claim liabilities
- Maximize equipment uptime
- Minimize driving outside planned routes
- Prevent breakdowns by scheduling reliable maintenance events
- Plan operating budgets more accurately
- Automate driver logs for greater accuracy
- Redeploy equipment to where it will be more effective
- Adhere more easily to environmental policies
- Improve customer service to citizens by effectively managing the completion of routes during storm events and sweeping operations

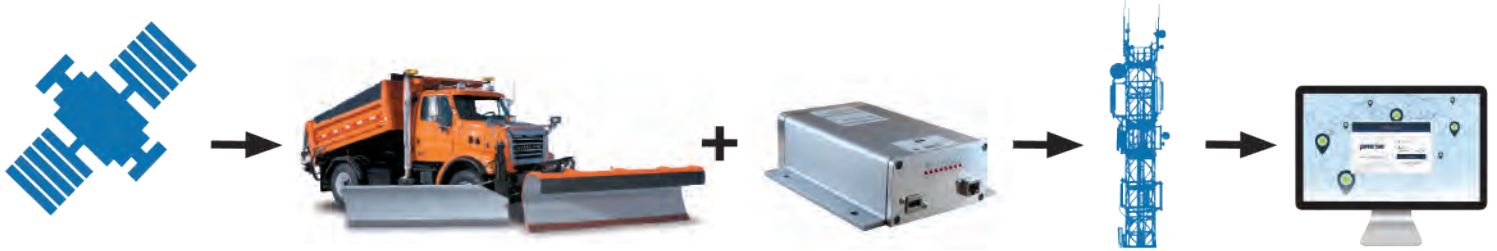

"How much material did we use during the last storm event?"

"Am I addressing critical road hazard issues such as downed signs, dangerous potholes, nonworking stoplights and damaged guardrails in a timely manner?"

"Which routes have my fleet of sweepers completed today?"

Let's face it, as a municipality you are held accountable for managing and reporting on a variety of items. In addition, you face tight deadlines, limited budgets, rising fuel, equipment costs and untimely weather delays. You need every advantage technology can bring you to gain better control over your mobile assets.

PreCise MRM understands the challenges you face, especially in today's ever changing market. That is why we offer a state-of-the-art information gathering system designed to track everything from the speed and location of your vehicles to the activity of your

equipment's accessories. Our system provides the data you need to better manage your mobile assets, improve your operating efficiencies and maintain a successful operation for years to come.

HERE'S HOW IT WORKS:

Installed in your equipment is a compact GPS device that gathers data critical to your everyday business decisions. This device captures equipment activity such as engine hours, odometer, accessory usage, as well as GPS location, heading, speed, date and time. PreCise MRM then securely transmits and stores this information in an enterprise-class data center where it is generated into easy-to-read, easy-to-understand reports and maps. This application is accessible anytime from anywhere in the world via standard web browsers, enabling you to better manage your mobile assets at all times.

Providing the industry's most accurate tracking and advanced reporting, PreCise MRM is your complete fleet management solution.
