A Heavy-Duty Solution For Saving Time and Money

BENEFITS

Every time you use PreCise® MRM you can increase your rental income and better maintain your equipment.
Here's how:

- Avoid customer invoice disputes
- Track exact equipment usage
- Prevent catastrophic failures due to misuse
- More effectively plan preventive maintenance
- Reduce service times and field repairs
- Better estimate time of arrival
- Accurately track time spent on a work site
- Monitor unauthorized equipment usage during off hours

"Why is my renter operating backhoe #360 while the engine is overheated?"

"How many hours did my last renter put on the engine of broom #546?"

"Why is scraper #447 operating with the low oil pressure light on?"

"When is the hydraulic system on track hoe #217 due for maintenance?"

Let's face it, managing a construction rental fleet can be quite the challenge. Your equipment is rented out weekly, monthly, or even annually. Maintaining control over the useful life of your assets seems impossible.

PreCise MRM understands the challenges you face, especially in today's ever changing market. That is why we offer a state-of-the-art information gathering system designed to track everything from the speed and location of your vehicles to the activity of your equipment's accessories. Our system provides the data you need to better manage your mobile assets, improve your operating efficiencies, and maintain a successful business for years to come.

HERE'S HOW IT WORKS:

Installed in your equipment is a compact GPS device that gathers data critical to your everyday business decisions. This device captures equipment activity such as engine hours, accessory usage, monitoring of engine temp and oil pressure as well as GPS location, heading, speed, date and time. PreCise MRM then securely transmits and stores this information in an enterprise-class data center where it is generated into easy-to-read, easy-to-understand reports and maps. This application is accessible anytime from anywhere in the world via standard web browsers, enabling you to better manage your mobile assets at all times.

Providing the industry's most accurate tracking and advanced reporting, PreCise MRM is your complete fleet management solution.
