Give Your Business a Lift with PreCise® MRM

BENEFITS

Every time you use PreCise® MRM you save money and increase your operation's overall productivity.

Here's how:

- Ensure the right equipment is in the right place at the right time
- Reduce fuel costs by:
 - Optimizing vehicle deployment
 - Decreasing idle time
 - Collecting information for fuel tax rebates
- Automate driver mileage logs including IFTA reports
- Control maintenance costs
- Increase vehicle uptime
- Understand utilization to help with future resource planning
- Reduce legal risks
- Ensure safe equipment operation

"Where is my closest available technician for dispatch to a site?"

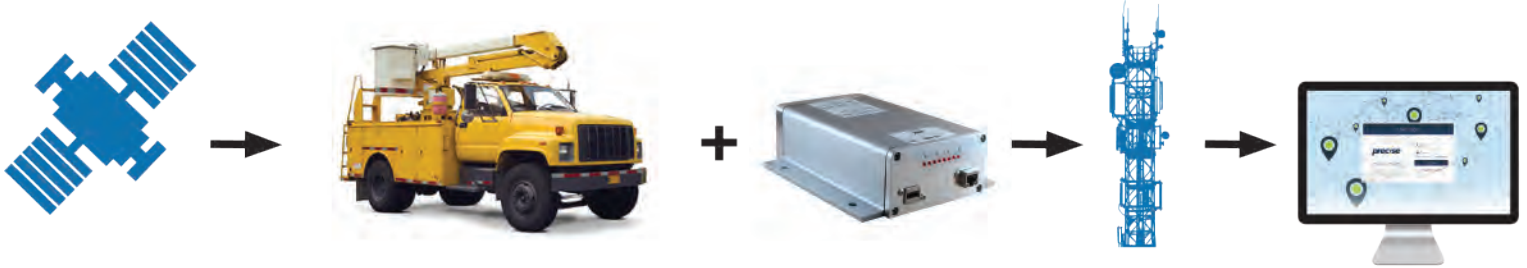

"How often is my equipment using fuel for non-taxable purposes?"

"How many miles did my equipment travel in each state?"

"When is the hydraulic system due for maintenance to assure our equipment is safe?"

It's one thing to execute a job, but it's quite another to do it with exact precision. Stay on track by being able to track, everything. With PreCise MRM, we help you ensure reliability, progress, and success.

PreCise MRM understands that being effective in this industry is all about resolving issues that arise, and doing so in the timeliest manner possible. That is why we offer a state-of-the-art information gathering system designed to track everything from the speed and location of your vehicles to the maintenance of your equipment. Our system provides the data you need to better manage your mobile assets, improve your operating efficiencies and maintain a successful business for years to come.

HERE'S HOW IT WORKS:

Installed in your equipment is a compact GPS device that gathers data critical to your everyday business decisions. This device captures real-time vehicle location, speed, direction and mileage for your entire fleet. Customized sensor integration can report on equipment activity such as power take off operation, lift system and welder usage. PreCise MRM then securely transmits and stores this information in an enterprise-class data center where it is generated into easy-to-read, easy-to-understand reports and maps. This application is accessible anytime from anywhere in the world via standard web browsers, enabling you to better manage your mobile assets at all times.

Providing the industry's most accurate tracking and advanced reporting, PreCise MRM is your complete fleet management solution.
